## Terms of Reference

### **Consultancy services for Social Impact Assessment of Proposed Jamrani Dam Multipurpose Project on Gola River, Nainital, Uttarakhand..**

#### **1.0 INTRODUCTION**

In the age of climatic change Government of Uttarakhand is committed to mitigate its effect by adopting a strategy to give priority to water harvesting / water storage structures to counter the water scarcity issues and cater the growing demand of water for drinking, irrigation, industrial and other purposes.

The Govt. of Uttarakhand has time to time given directions to prepare proposals for finding possibilities of constructing reservoirs on Rivers of the state to store the surface water during monsoon season to overcome the problems of irrigation, drinking water and harvesting of rain water for the improvement of water resources and ground water table. Artificial lakes are also site of attraction for tourists and can also be used for water sporting activities. By constructing reservoir on the rivers, the local tourism and fisheries might also be promoted.

#### **2.0 Location of proposed site:**

The project envisages 130.60 m high Roller compacted concrete gravity dam. The proposed dam axis is located at Lat. 29° 16' 12.5" N; Long. 79° 36' 45.1" E

#### **3.0 Project Features & objectives**

Uttarakhand Irrigation Department has planned to utilize the water resources of Gola river by constructing a dam on river Gola, Distt Nainital (Uttarakhand) for providing irrigation benefits to additional 57065 ha of command area located in Uttarakhand and UP over 238317 ha being irrigated at present. Apart from this the dam is to augment the drinking water needs for the ever increasing population of Haldwani which faces acute water crisis during summer months. In addition a small hydropower unit for generating 14 MW power is also being included in the project.

The project envisages construction of a dam 130.60m high on Gola river upstream of existing Gola barrage, located about 10 Km upstream of Kathgodam in Nainital District of Uttarakhand. A part of stored water shall be released into the existing canal systems constructed during Phase-I of the project, to meet the irrigation and drinking water requirements. By construction of the dam some of the water will seep into the ground and will supplement the ground water table, which in turn, will enhance the output of tube wells in the vicinity and storage of water will help in recharging the ground water and augmentation of natural water sources in downstream. Tourism and Fisheries may also be developed.

## 5.0 Overview of Social Impact Assessment

Social Impact Assessment is a process that provides a framework for prioritising, gathering, analyzing and incorporating social information and participation into the design and delivery of developmental intervention. It ensures that development interventions are:-

1. Informed and taken into account the key relevant social issues.
2. Incorporate a participation strategy for involving wide range of stakeholders.

At micro levels SIA impacts on individuals. At macro level it impacts on collectives e.g. group of people, institutions and organisations. At macro levels SIA impacts on social macro system e.g. national & international political and legal systems.

## 6.0 Scope of work in Social Impact Assessment

1. Assessment as to whether the proposed acquisition serves public purpose.
2. Estimation of affected families and the number of families among them likely to be displaced.
3. Extent of lands, public and private, houses, settlements and other common properties likely to be affected by the proposed acquisition.
4. Whether the extent of land proposed for acquisition is the absolute bare minimum extent needed for the project.
5. Whether land acquisition at an alternate place has been considered and found not feasible.
6. Study of the social impacts of the project, and the nature and cost of addressing them and the impact of these costs on the overall costs of the project vis a vis the benefits of the project.
7. Study of the impacts of the project on various components such as livelihood of affected families, public and community properties, assets and infrastructure

particularly roads, public transport, drainage, sanitation, sources of drinking water, sources of water for cattle, community ponds, grazing land, plantations, public utilities such as post offices, fair price shops, food storage godowns, electric supply, health care facilities, aanganwadis, children parks, places of worship, land for traditional tribal institutions and burial and cremation grounds.

8. Preparation of a social impact management plan listing the ameliorative measures required to be undertaken for addressing the impact for a specific component referred to above and such measures shall not be less than what is provided under a scheme or programme in operation in that area of the State Government or Central Government.
9. Conducting public hearings in each of the affected villages after giving adequate publicity about the date, time and venue for the public hearing, to ascertain the views of the affected families to be recorded and included in the Social Impact Assessment report.
10. Publication of the Social Impact Assessment report and Social Management plan in local language and made available to the the respective Panchayats, offices of District Collector Nainital, the Sub Divisional Magistrate Nainital, tehsil, affected areas and uploading the same also on the website of Uttarakhand Irrigation Department.

#### 7.0 Departmental Assistance

1. SIA<sup>EIA</sup> studies done during preparing of initial DPR of the proposed site if required shall be provided by the department.
2. Any other study done regarding SIA .
3. Topographical survey sheet of the Dam site can also be provided (if needed).
4. Data of survey being carried out by the department can be accessed by the applicant provided the rates quoted for the assignment reflect the same in the proposal for SIA studies.

#### 8.0 Deliverables

##### Key deliverables during the project

- i. Inception Report,
- ii. Submission of Draft Social Impact Assessment Report including Social Management Plan,
- iii. Submission of Final Social Impact Assessment Report after incorporating comments from Irrigation Dept., Uttarakhand,

1. The time period for the task is 03 months. The consultant/firm shall provide a final report to the Irrigation Department, Uttarakhand.

**Approach & Methodology specific to the project**

Approach, methodology and work plan are key components of the Technical Proposal. You are suggested to present your Technical Proposal inclusive of charts and diagrams for Full Technical Proposal, divided into the following three chapters:

- a) Technical Approach and Methodology,
- b) Work Plan,
- c) Organization and Personnel,

a) **Technical Approach and Methodology-** In this chapter you should explain your understanding of the objectives of the assignment, approach to the services, methodology for carrying out the activities and obtaining the expected output and the degree of detail of such output. You should highlight the problems being addressed and their importance and explain the technical approach you would adopt to address them. You should also explain the methodologies you propose to adopt and highlight the compatibility of those methodologies with the proposed approach.

b) **Work Plan-** In this chapter you should propose the main activities of the assignment, their content and duration, phasing and interrelations, milestones (including interim approvals by the Client) and delivery dates of the reports. The proposed work plan should be consistent with the technical approach and methodology, showing understanding of the TOR and ability to translate them into a feasible working plan. A list of the final documents, including reports, drawings and tables etc. to be delivered as final output, should be included here.

c) **Organization and Personnel-** In this chapter you should propose the structure and composition of your team. You should list the main disciplines of the assignment, the key expert responsible, proposed technical and support personnel. You shall also specify if you will be the lead firm in a joint venture or in an association with Sub-Consultants. For joint ventures, you must attach a copy of the joint venture

## 10.0 Procedure for submission of bids

Bidding firms shall submit the technical as well as financial proposal in hard copy at the office of undersigned. The two parts of bid submitted shall be captioned as follows on the respective envelopes:

Part 1: Technical Proposal

Part 2: Financial Proposal.

### PART 1: Technical Proposal

Applicants shall submit the application comprising of the following documents in the formats as given in Statement-I to V, Enclose the documents supporting the eligibility criteria. In addition to this, methodology to be adopted must also be submitted.

### PART 2: Financial Proposal

It shall be submitted in the format as given in RFP form.

1. The Rates/Amount shall be quoted both in figure and in words. In case where rates not written in figures or illegible or different than written in words, the rates written in words shall be taken into account.
2. Applicants should quote rates exclusive of applicable taxes. All applicable taxes shall be mentioned separately.

## 11.0 Evaluation

Those who qualify the technical bid shall only be considered eligible for taking part in the financial bid.

## 12.0 Award of Contract

1. The firm qualified in technical bid as well as financial bid would be considered for the award of the Project, decision of which shall be the sole discretion of Irrigation Department. Negotiations regarding the various component of work shall be done as required. Negotiations will include a discussion on the Technical Proposal, the proposed technical approach and methodology, work plan, organization and staffing and any suggestions made by the firm to improve the Terms of Reference. The Client and the firm will finalize the Terms of Reference, staffing schedule, work schedule, logistics, and reporting. These documents will then be incorporated in the contract document. Special attention will be paid to clearly defining the inputs and facilities required from the department to ensure satisfactory implementation of the assignment. The department shall prepare minutes of negotiations which will be signed by the department and the firm.
2. Negotiations will conclude with a review of the draft contract. To complete the negotiations the department and the firm will initial the agreed Contract.
